Motion to Subpoena Evidence

2/7/24

The prison has been aware of this issue since December and they haven't acted or interviewed me about it, or had investigations informed until today (2/7/24) when I spoke with Cheir Hammer who was given false information that had to be rectified. They should not have waited so long and likely are only speaking of it to me now is that they found out it was made a case. They have a habit of running the clock and then saying it's too late to investigate. They are constantly looking for ways to void issues than actually deal with them. I feel it is pertinent to ascertain the recording of the conversation with Cheir Hammer today to put into context how little they have done about this issue, not only was he not aware of it till today they didn't even have the right name proving they do not take it seriously and have not done any work or investigating about this issue.
